First Edition

1 Appearance Settings

New appearance settings in R:Charts allow for an enhanced resolution of chart images to display in forms and reports. The settings, "Soft Chart" and "Soft Text" can be applied to the chart object itself, and to the chart text. When using the settings, Soft Text is interpreted only if Soft Chart is ON/checked.

Using the Object Inspector toolbar, with "Chart" selected, the "Soft Chart" and "Soft Text" options are available. In the following image, the two settings are not checked.

In the following image, Soft Chart is checked and Soft Text is not checked.

In the following image, Soft Chart is checked and Soft Text is checked.

The Soft Chart and Soft Text settings are also available within the Chart Editor.

2 Command Syntax

The updated PLUGIN command syntax for R:Charts includes the two additional parameters to enhance the appearance for charts.

- **SOFT_CHART** - Specifies to use an enhanced/smooth display for the chart objects (ON/OFF)
- **SOFT_TEXT** - Specifies to use an enhanced/smooth display for the chart text (ON/OFF)

When using the appearance parameters, SOFT_TEXT is interpreted only if SOFT_CHART is ON.

Example:

```
PLUGIN RCharts vResult+
|FILENAME Quarterly_BaHorizontal.rbc +
|SAVE_TO_JPG Quaterly_Ba.jpg +
|CHART_TITLE Quarterly Summary +
|LEGEND_TITLE Summary +
|SOFT_CHART ON +
|SOFT_TEXT ON
```
